This unit is a standard Micropac Stainless Steel, Hand Pump. Ordering options are in our data sheet.
Also available as 7cc/700 bar, 12cc/407 bar, 25cc/204 bar & 100cc/50 bar.
Please consult Sarum Hydraulics for more information on our range of pumps to meet a wide range of operating requirements.

For Service Kits and Spare Parts, please consult the factory. We can offer comprehensive seal kits, with instructions and a video tutorial, which can be found here:

Alternatively, you can return the complete hand pump to our Salisbury Factory for us to investigate and repair for you. Please contact us before returning the pump.

Use and maintenance to be in accordance with written instructions.

Unit for use on approved fluids only. Consult factory if in doubt.

While every effort has been made to ensure the accuracy of this exploded drawing and bill-of-materials, this document is for reference only and may be updated or modified without prior warning at any time.

No unauthorised reproduction in whole or part without the written permission of the Copyright holder.

Micropac is a Registered Trade Mark of Sarum Hydraulics

This drawing is suitable for any variation of an MW-3-49 (49cc) hand pump. The basic hand pump has blanking plugs fitted, and accessories are shown in the "Note" boxes.
